Click Systems has been developing system-based structures and showcases in Australia for over 25 years. We specialise in servicing the Australian Museums and Galleries community and believe our range of showcases to be among the most versatile and technically advanced in the world. Over the years, Click has also produced many innovative product lines for shopfitting, office furniture, exhibition display, and lighting.

No matter where you are located in Australia every custodian of our history and heritage shares the common need to securely and cleanly store and display their collections in an appropriate and cost-effective fashion. At Click we recognise that the needs of this community can range widely from relatively simple background storage situations up to highly elaborate and complex environmentally controlled high-security display units.

Whatever you might need Click has the right solution for your circumstances - no matter how simple or complex Click are the only Australian manufacturer and supplier who can offer you the right choice from a comprehensive range of purpose-designed and cost-effective solutions. Recent developments have seen some exciting new products in our range and our website can be found at www.clicksystems.com.au.

If we can be of further service to you please contact us on 1800 805 842
CLICK SHOWCASES AT A GLANCE

QUADRANT ~ Completely compatible with the entire range of CLICK system products QUADRANT is a fully specified medium performance affordable showcase system available in radiused, chamfered or square sections. Lighting and sophisticated shelving and door systems are incorporated in the QUADRANT showcase system. Unusual in this type of system, QUADRANT is capable of accepting panels up to 13mm thick and glass up to 6.38mm laminated. This provides a far greater degree of strength and durability than any other comparable system.

GALLERY 20 ~ Our GALLERY 20 Showcase system has been developed to provide Museums, Galleries and Libraries with a state of the art display medium. The Gallery 20 range of showcases is specially designed for travelling exhibitions or as a budget solution for permanent displays where high visibility is important. The showcases can be readily assembled for a static display or broken down and reassembled many times for a travelling exhibition. GALLERY 20 showcases consist of fully framed panels using narrow interlocking natural anodised aluminium extrusions.

INCA ~ Our INCA showcases are produced in custom sizes and may be in single or multiple bays. Constructions vary from bonded glass top through demountable, rapid assembly or fully specified high security museum grade cases. INCA Bonded Glass Top Cases are suitable for single bay cases where the most minimal appearance is desired. Lighting is from outside the case or by the use of reflex FLEX fibre optics. Optional accessories include silica-gel systems for environment control, pendant or cantilever shelving, fluorescent, low voltage or fibre optic lighting and pull-and-slide or hinged doors. INCA Demountable Glass Top Cases are suitable for single or multiple bay cases where it is desired to be able to dismantle a glass topped case in the future.

MONO ~ Our MONO Casefront is a simple sealed hinged frame that provides both security and environmental protection. The frame is easily incorporated into metal or timber structures. The framed nature of the design makes the use of anti-reflective glass simple. MONO-3D takes this principle further joining two MONO Casefront frames with demountable rails and panels to form a complete case. MONO-3D are demountable framed cases suitable for single bay structures that need to be dismantled on a regular basis. Cases come standard with two doors fitted to opposing faces. The basic case is glass-topped but lighting can be incorporated.

CLAM ~ Our CLAM-S Sealed Glass Box System provides moderate security with excellent environmental protection. Limited to 6.38mm laminated glass, the system provides minimum visual obstruction to the housed object. Access is by lifting the case top so sizes are limited. CLAM-LD uses 9.5mm laminated glass that meets full ‘anti-bandit’ specifications. The case provides a slimmer high security case than CLAM-HD at a lower cost. Gas strut supports are provided for horizontally mounted cases but the system is particularly suited to wall mounting with side hinged access. CLAM-HD, the ‘heavy duty’ CLAM case, provides the highest level of security in the range. Gas struts and Abloy locking are all standard.

QUDOS ~ QUDOS is our range of QUADRANT style Showcases with minimal visual obstructions to the front of the showcase. All styles can be customised to suit your needs. Lighting Options include Low Voltage Down Lights (with or without dimmer switches), Fluorescent and FLEX Fibre Optics. The most noticeable difference between QUDOS and our standard QUADRANT range of showcases is that QUDOS does not have any aluminium uprights to the front. Visually this showcase gives the feel that it is a frameless showcase designed for museums, shops and offices. The aluminium uprights at the back allow security to be maintained for either hinged or rolling doors in glass or solid panels and Click always recommends and uses Abloy security locks.
TETRAS ~ Showcasing Australia for 30 Years

Click Systems has been developing system-based showcases in Australia for 30 years. We specialise in servicing the Australian Museums and Galleries community and believe our range of showcases to be among the most versatile and technically advanced in the world.

Our NEW TETRAS Showcase system is a demountable conservation grade modular showcase. Now your investment can be reconfigured from single to multi bay to suit your exhibition requirements. There are many styles available in our TETRAS showcase system these include free standing towers, wall mounted and table tops, which are fitted with hinged door and Abloy locks for added security.

To compliment our TETRAS Showcase system, we have a range of lighting and shelving options to suit all of your needs. We can also customise your exposed surfaces with a 2 pack auto grade paint finish of your choice.

The Australian Showcase & Hardware Company

Showcasing Australia for 30 Years

Click Systems is a family owned Australian manufacturing enterprise and Australia's leading provider of Museum showcases and showcase solutions to every State in Australia. Our clients include Australia's major Museums, Galleries and Libraries.

Click Systems have had many exciting years with the successful completion of a number of major Museum and Library projects. Click here to see some photographs from these projects. Click here to download our Products and Projects PDF. (To view this file, you will need Adobe Acrobat Reader. This can be downloaded free from www.adobe.com).

Since 1977 we have been building Museum quality glass display cases and in 2000 we expanded our production capacity to incorporate an in-house hardware manufacturing plant. Since this time we have produced HVP cabinet and architectural hardware and we now manufacture over 200 glass, aluminium, brass, steel and stainless steel products.

Click Systems are still offering many of the cases in our Showroom at pro-loved prices. We locally manufacture a wide range of showcases to satisfy all of your display and conservation needs. Our Quadrant, Mono, INCA-IY, CLAY, Gallery 20 and NEW TetraS Showcase systems are the Australian market leaders in their classes. Sample images of each system can be found in our Showcase Galleries. Click here to download our Showcasing Australia Brochure.

All of your email enquiries will be answered within 1 day or call us on 1800 805 842 from anywhere in Australia.
